DNA extractions were performed on Items 2, 3, 4, 5 and 6 as well as on the bloodstain from R. Charles (Item 13) and the cheek swabbing from T. Bean (Item 14). These extracts were then quantitated, amplified, and tested with DNA genetic markers Amelogenin, CSF1PO, D13S317, D16S539, D18S51, D19S433, D21S11, D2S1338, D3S1358, D5S818, D7S820, D8S1179, FGA, TH01, TPOX, and vWA. Item 6

Examination of the swabbing from the one (1) 20ga live round shotgun shell (Item 6) revealed the presence of one (1) allele(s). Due to the limited amount of information obtained from this profile, it is unsuitable for upload into CODIS and can only be used for exclusionary purposes. The DNA profile obtained from T. Bean was excluded as a contributor. No conclusion can be rendered as to the contribution of the DNA profile from T. R. Charles (Item 13).

Items 2, 3, 4, and 5

No DNA profile was obtained from the swabbings from the Remington shotgun and the shotgun shells (Items 2, 3, 4 and 5, respectively).

Only Item(s) 14 will be routinely queried against the CODIS (Combined DNA Index System) Database.

DISPOSITION OF EVIDENCE:

The evidence was previously returned to the investigating agency.
